Front-end developer Bogdan Yanovsky

+38-095-712-3808
Kharkov 61001
Ukraine

Hello,

My name is Bogdan and I am a Frontend Developer. I have been developing websites and applications for around 6 months. For the most part, my experience is in the development of the layout of the site structure, its styles and logic from the frontend.
 I have worked with HTML/CSS, Javascript/Reacr, PHP.

I am actively looking for a job, my career. I want to move in the direction of website development, as well as gain new knowledge to improve development skills

In my resume you will find a summary of the history of education. If you would like to see some of the projects I work on in my spare time My GitHub profile: https://github.com/BogdanLrgrndarniy/Home_works

If you look at my github, then these are mostly standard projects that are not finalized. I don't believe they accurately reflect the quality of the work that I will be doing as a staff member, but they will give you an idea of the technology that I work with frequently. I am more than happy to create a sample web application project to showcase my full stack / development skills.

Sincerely,

Bogdan Yanovsky,
